## Work Experience

### AIVA Group

November 2023 – Present

Front-end Developer, RPA

Tashkent

- Development of websites for various companies and clients, considering diverse needs and complexity levels, from simple structures to complex systems. Successful creation of CRM platforms and admin panels tailored to business requirements. Integration and optimization of solutions for interaction with 1C systems, ensuring efficient workflows and data management.
- Writing automated tests using **Cypress**, ensuring the reliability and functionality of web applications. Applying various testing approaches, including end-to-end, integration, and component testing.
- Development of over 100 software robots for business process automation, which accelerated routine tasks and improved accuracy. Development and implementation of **RPA** solutions, successfully integrated into the company's workflow. These initiatives helped optimize processes and reduce employee workload.
- Working directly with clients, without intermediaries, to gather requirements, understand their vision, and provide solutions. Maintaining clear and effective communication to ensure alignment of project goals and expectations.

### Madison Group

April 2023 – October 2023

Front-end Developer

Tashkent

- Development from SPA applications to complex web services using various approaches and technologies.
- Parsing over 200,000 products from client websites for site migration to another technology.

## Projects

Oryx | *Next.js, TypeScript, MUI*

September 2024

- Development of a CRM panel for convenient work with clients and their package data.
- Development of an admin panel for content management on the website.
- Creation of a virtual machine on Linux for deployment on Google Cloud, enabling the program to run daily from the cloud.

4car | *Next.js, TypeScript, Tailwind*

November 2024

- Development of a CRM panel for convenient work with products and SEO.
- Development of a shopping cart and integration of a payment system for orders.
